Press Release

York, Pennsylvania, USA

July 19th, 2016

TIM MELITA NAMED GRAHAM ENGINEERING CORPORATION VICE PRESIDENT OF OPERATIONS

David Schroeder, president and CEO of Graham Engineering Corporation, has named Tim Melita vice president of operations. In this role, Melita will have responsibility for inside sales, purchasing, production, and customer service for all three of the company's brands and its 157,000 square foot facility in York, Pennsylvania.

"It's my pleasure to announce Tim's appointment. His knowledge of and experience with plastic processing equipment, supply chain, and manufacturing coupled with his leadership skills make him a natural fit and a good addition to the team," said Schroeder.

Melita joins Graham Engineering Corporation from Teknor Apex where he was plant manager. Previously he had served in manufacturing leadership roles with Husky Injection Molding Systems and the Allison Transmission division of General Motors as well as project management for Raytheon. Prior to his civilian career, he served seven years as a communications officer in the U.S. Army.

He holds a B.A. History from the University of New Hampshire and has completed advanced training in the U.S. Army with additional certification in Lean, Kaizen, Just-in-Time (JIT), and Toyota Manufacturing System (TMS).
