

GRAHAM ENGINEERING

Press Release  
York, Pennsylvania, USA  
June 15, 2016

**GRAHAM ENGINEERING CORPORATION NAMES ROBERT SCHROEDER AS DIRECTOR OF BUSINESS DEVELOPMENT FOR BLOW MOLDING SYSTEMS**

Graham Engineering Corporation has appointed Robert Schroeder as director of business development for blow molding.

Mr. Schroeder will be responsible for worldwide commercial leadership of Graham Engineering's range of blow molding systems.

"Rob brings a successful track record of strategic business development throughout the blow molding value chain," said Bob Deitrick, vice president of global sales. "His experience driving innovation and delivering value for consumer packaged goods companies and converters provides special insight that will translate into expert support for our customers and prospects.

Robert Schroeder comes to this new position after being business development manager at Graham Packaging Company, a customer of Graham Engineering. "I have a deep respect for the Graham Engineering legacy of innovation," Mr. Schroeder said, "and I fully understand why Graham Engineering technology is the platform of choice among leading converters and brand owners. I am honored and excited to join the team."

Mr. Schroeder entered the plastic packaging industry in 1997. Prior to working for Graham Packaging, he was responsible for managing business units, key accounts, product lines, and general sales with Berry Plastics, Sequist Closures (Aptar Group), and Phoenix Closures.

He holds a BSc. degree in Operations Research Engineering from Cornell University and an MBA in Management and Marketing from the University of Connecticut.
