GRAHAM ENGINEERING CORPORATION ADDS BRAD LOVELACE, GROWS PROCESS TECHNOLOGY TEAM

Graham Engineering Corporation has appointed Brad Lovelace as Process Engineer.

In this role, Mr. Lovelace will be a member of the Process Technology team responsible for technical and customer support including product development, product and system testing.

“Brad brings a demonstrated track record of medical extrusion operations and management including product development, technical support, and extrusion laboratory management,” said Steve Maxson, business development director of extrusion. “His hands-on experience and proficiency at extruding catheters, balloons, shafts, bump tubing, and multi-layer tubing will directly benefit our customers.”

Brad Lovelace previously held the roles of extrusion engineering technician at Merit Medical Systems and lead extrusion operator and supervisor at Medtronic, Inc.
